SUBJECT: Spancrete Work

To Whom it May Concern,

JAW's Services Inc. performed both major grading and storm water management work at our Valders, WI facility in late 2013. The extent of the work included filling and grading approximately 15 acres of land to make it usable for storage of large bridge girders. In addition JAW's installed approximately 200' of large drains and graded that area to eliminate water infiltration into our building.

The work was completed on schedule and Spancrete is very satisfied with their work.

Best Regards,

Dan Willems
